

GIS Taiwan 2021 Regular Registration Starts

Since last September, we have been visiting professors from various fields and leading corporations, searching for the best resources. For 10 years, we have flown to universities around the world to seek partnerships, achieving the goal of hosting delegates from over 15 countries annually.

Being the largest international symposium in Taiwan, our first-hand information comes from the best minds in the academic field. Our mentors come from leading corporations. Our international career simulations come from overseas connections. As an international forum, we host cultural festivals, banquets, and parties in addition to the academic activities.

What we offer is not just an invitation to the symposium, but also a ticket to a bright future.
